WP Leader: ETSI

The aim of this work package is to:

- Develop harmonised European Thematic Network requirements in relation with current and future research projects
- link with RFID Projects inside Europe and liaise with international organisations

WP4 will create the environment for progress in relation to European standardisation and critical infrastructure governance issues; Harmonisation and standardisation related activities will be addressed, which also addresses the requirement to support the European Commission. WP4 will also define common terminologies.
